Why you should invest in this house

Apart from the value of the house and its attractive surroundings,

important news published in the media on 25 June affects the value and interest in buying/investing in this excellent property as soon as possible

The construction of a data centre in the town of Gazolaz has just been announced, with an investment of 3.3 billion euros, the creation of 2,600 jobs, and the installation of numerous technology companies in the area.

As a result, the value of houses and land will increase significantly, so don't miss this opportunity.

We are in a privileged environment where our 13th-century Romanesque church and 21st-century high

technology come together with the creation of the new Data Centre.

In September, we will raise the price, and at the end of the year, with the official approval/launch of this project, we will raise it again.
