A unique investment opportunity offering a combination of energy efficiency, well-developed infrastructure, and excellent potential for residential or resort development.

A 5 MW photovoltaic power plant (4999 kWp) located just 3 km from the city of Ruse, in a peaceful and green setting ideal for both investment and comfortable living.

The land consists of two regulated plots (UPI) with residential building rights. The fenced and landscaped site already includes a restaurant, swimming pool, hotel facilities, utility building, sports areas, and a security apartment. All utilities — electricity, water, and security — are connected.

### Technical specifications:

28 Siemens inverters

28 Siemens combiner boxes with short-circuit protection

8400 high-class solar panels with a 30-year extended service life

2 transformer stations (BCTP), registered in the cadastre

Main distribution board prepared for a 10 MW energy storage and trading system

Siemens remote control system

4 active and 1000 passive lightning rods

Free space for additional 500–800 kWp under East–West mounting system (legally allowed 20% capacity expansion after commissioning)

Main cabling installed for the full projected capacity

Dedicated connection points for future installations

2 protective sheds for inverters

Site fenced with 3 mm mesh, 2 m high, with gated access

800 meters of ligustrum hedge planted along the fence to reduce dust

Flat, stone-free terrain with no shadowing

Video surveillance system with 8 MP cameras and perimeter detection

Alarm system (SOT) with max. 10-minute reaction time and central monitoring

The location offers a rare combination of green energy investment with the opportunity to build a residential complex, spa hotel, or private estate.
