With construction potential for the execution of a subdivision for 8 single-family homes.

Very well situated, this land, despite being rustic, is classified as: Urban Land - Type III Housing Space + Ecological Structure, with the urban parameters of Art. 64, according to study.

The construction potential considered was based on the combination of urban parameters identified in the PDM, with the surroundings and the characteristics of the local market.

It is located in a residential area of detached houses and several plots of land still in their natural state. It has excellent views and fantastic sun exposure.

Don't waste time and book your visit to this very well-situated plot of land, in a village, but close to the big cities of the North, being only a distance of:
