Περιγραφή:

This attractive coastal property in Barra do Itariri (Bahia, Brazil) offers an excellent opportunity for investors and project developers.

The total area covers around 40,000 m² and has been divided into two independent plots of around 20,000 m² each, which can be purchased individually or together. In addition, there is a larger total area of over 22 hectares that offers further development potential.

The plot is only about 50 meters from the sea and has secure access to the beach. The area is flat, almost square in shape and is ideal for structured real estate projects.

The surrounding area is characterized by a combination of beach, dunes and lagoon landscape and is becoming increasingly important for tourism and business.
