A new residential landmark in Gondomar

A premium condominium located in São Cosme, Gondomar, created for those looking for more than just housing: they are looking for comfort, exclusivity and a differentiating living experience.

Developed by the renowned MUTANT Architecture & Design office, this project is distinguished by its contemporary, elegant and timeless architecture, each element was thought out in detail to create a unique

space, where design and functionality come together in a harmonious way.

With only 6 fractions, from T1 to T4 typologies, this premium condominium offers a reserved, sophisticated and exclusive environment.

The apartments stand out for their large glazed spans, which allow excellent natural light to enter, making the spaces brighter, more welcoming and visually impactful, a careful selection of materials and high-quality finishes reinforces the premium positioning of the development, creating the ideal balance between aesthetics, comfort and functionality.

The fractions with three and four solar fronts have a practical and modern organization, the social area develops in an open space concept, integrating living room and kitchen in a fluid way, with direct connection to a large balcony that works as a natural extension of the interior space, the private area includes elegant suites, equipped with built-in wardrobes, private balcony and full bathroom.

For greater convenience, the fractions have parking spaces and, in the case of the T3 and T4 typologies, a closed garage for two vehicles, as well as storage, ensuring functionality and safety in everyday life.

Outside, the condominium offers garden spaces and controlled access, creating a quiet, exclusive environment designed to provide greater privacy and well-being.

MAP OF FINISHES AND RELEVANT FEATURES
