Descripción:

We find a Pavilion very close to one of the best and promising Zones of Deusto, according to the current urban project. 200 Mts, consists of 2 floors.

On the ground floor, at street level, we can see that currently it is used to store various items, which does not prevent this from allowing us to see the great breadth of the space, as well as the ceiling height. At the back, practically in an interior, there is a hole with enough meters to carry out the work corresponding to the installation of a bathroom or toilet, if you prefer, with plenty of room to use it as a storage area or similar.

Includes all the necessary facilities to register at the time required, as well as the corresponding water intake.

We climbed the first floor by comfortable and at the same time very well-armed stairs, made of iron and wood, through which both the ground floor and the first floor enter, as for this, a doomed door with an upper opening leaves the passage of a total clarity from the bottom of the space. This plant, totally diaphanous, measures 1.65 meters. , which gives us several possibilities, including storage.

The pavilion is very close to the subway and different bus lines. Great Business opportunity! - REF: Montserrat 407171
