Descripción:

Located in one of the city skyline's most recognisable residential complexes, designed by Daniel Libeskind, this seventh-floor apartment perfectly embodies the contemporary lifestyle of CityLife. With an internal floor area of approximately 154 sqm and two terraces totalling 50 sqm, this estate combines the charm of sinuous architectural lines with the functionality of a meticulously planned layout: three bedrooms, two bathrooms, a living area with usable outdoor spaces, and a big double garage in the basement. The apartment has been tastefully refurbished, using high-quality materials, wooden flooring and designer built-in wardrobes that complement the floor-to-ceiling windows and views of the park and the towers. The complex also offers a range of high-quality communal facilities, including a spacious children's playroom, a bicycle storage room, a residents-only fitness area and communal spaces set amidst the well-maintained greenery of the communal park. The centralised heating and cooling system, the presence of a concierge and dedicated security, the high-speed lifts and the large, easily accessible double garage of approximately 33 sqm complete the picture of comfort. The flat does not have a cellar, but this is offset by the generous internal floor area and the numerous built-in storage solutions. Ref. 15725
