Descripción:	
Location:	Splitsko-dalmatinska županija, Okrug, Okrug Donji.

This modern, luxurious villa is also one of the few properties along the entire Adriatic coast, located in the first row along the coast. Most new buildings in Croatia are usually built a few hundred meters away from the sea or inland. This results from the limited availability of the coast and increasingly strict building regulations, which prohibit the construction of buildings on the coast itself.

From the terrace equipped with an 11-meter heated pool, you can enjoy a stunning view of the sea and the coast on the other side. Thanks to floor-to-ceiling aluminum-framed windows, this unique view remains within your line of sight, even if you're standing in the 84 m2 living or dining area.

There are additional large terraces on the second and third floors. One of them is equipped with a jacuzzi.

The villa has a total area of about 350 m2 and consists of 5 bedrooms and 5 luxuriously equipped bathrooms. Each of the floors can be used as a separate residential unit.

The house was built only with top-class materials. The floors are covered with elegant, large-format ceramic tiles and covered with parquet. Frameless doors allow easy movement between rooms, and together with floor-to-ceiling windows, give the attic the character of a building without violating privacy.

To protect your cars from wind and bad weather, the villa is equipped with a garage with two parking spaces.

Undoubtedly, the beautiful greenery around the residence completes the whole picture, and together with modern lighting, will make every evening unforgettable.

An exceptional addition to the entire experience is certainly the astonishing vegetation around the residence, which, combined with modern lighting, will make every evening unforgettable.
