Descripción:

ITHLUX Sevilla offers you this exclusive apartment in Cueva de Menga, a home designed for those looking for daily comfort in a consolidated and very practical area of East Seville.

With 108 m² built according to the cadastre, the apartment offers a very interesting combination: good natural light, functional layout, three bedrooms, two bathrooms and an unusual added value in the area: garage space and parking space included in the price.

The house is located on the third exterior floor with a lift. Upon entering, we find a day area consisting of an entrance, living-dining room and an independent equipped kitchen. The layout allows for a clear separation of everyday spaces from the rest area.

The night area is differentiated by a door, providing greater privacy. It has three bedrooms and two full bathrooms. The master bedroom has an en-suite bathroom, while the second bathroom serves the rest of the house.

The apartment is in good condition and has central air conditioning, double glazed windows with thermal break and anti-bumping armored door. It also has a small glazed terrace, useful as an auxiliary space.

The environment especially reinforces the family and daily use of the house. It is next to the German School and the Miguel Servet Institute, close to the health center and very close to the Supera sports center, which allows you to have a swimming pool in summer and winter, as well as educational, health and sports services at hand without assuming them as a mandatory community expense.

Unlike other homes in the area that support their attractiveness in large common areas, this apartment offers a more practical proposal: good location, bright housing, comfortable distribution and resolute parking for two vehicles.
