Description:

Its façade cheers those who pass, from the outside it seems to be small, inside it is cozy and full of charm. The natural light is well used and the old construction gives cool environment in summer and mild in winter. There are 39 sqm indoor and a mezzanine where is the sleeping area. The bathroom has a bathtub and window. The sunny terrace with pergola is perfect for any time of the day because it is sheltered from the winds of the region.

The villa is ready to live, has been renovated, the kitchen is electric, being only used gas for the baths. On the terrace there is a storage room that is used as storage.

Situated in a quiet street, parking is done a few meters from the door. A good opportunity for a couple or as an investment for local accommodation.

Come to see this house and fall in love with its unique charm.

A few minutes from Budens where you can find the Intermarché hypermarket with bakery, stationery, butcher, fishmonger and basic necessities, it is still a short distance from the beaches of the Costa

Vicentina.

Barão de São Miguel is a quiet parish in the municipality of Vila do Bispo. This is a rural locality, of great peace of mind that has quietly survived the urban and tourist development of the Algarve region in recent decades.

The village is characterized by its target houses of colorful strip around windows and doors, topped by the typical tracery chimneys of the Algarve, in a frank Moorish influence, given the proximity to North Africa and the many years of Moorish occupation of the territory.

This typical village surrounded by rounded hills covered with steppes is proud of its Mother Church with origins in the sixteenth century, which maintains the typical moth of the architecture of the place, consecrated to St. Michael, Archangel, which imposes itself in the center of the town, for its situation, for the whiteness and simplicity of its façade, surrounded by a small churchyard and finished, to the south, by a bell tower, which can be climbed from the outside. Thus, the

beautiful eighteenth-century carved altarpiece stands out, where flowers, vine leaves and twisted columns coexist with two small angels, framing the central element of the High Altar: the image of the patron saint, St. Michael, with his martial robes and his typical Scale an instrument of behavioral evaluation of souls, in Christian Catholic doctrine.
