Description:

We present this large garage of 240 m², located in the basement of a building, an ideal option for those looking for a safe, comfortable and versatile space, both for private use and for investment.

The property has comfortable and functional accesses, including automatic mechanical door for vehicles and independent pedestrian access, which facilitates entry and exit with total comfort.

Thanks to its large surface, it offers capacity for several vehicles and allows multiple possibilities of use: private garage for families with several cars, space for a company fleet, storage area or even as a complement for those who need additional storage space.

Its location in the basement provides greater protection against the weather, helping to keep vehicles in better condition and offering a more stable temperature throughout the year.

The space stands out for its spaciousness, privacy and ease of manoeuvre, making it a practical solution for those who value the security, comfort and availability of a large surface in a sheltered location.

A unique opportunity to acquire 240 m² of useful space in the basement, with excellent access and great potential for use.

Contact us for more information or to arrange a visit without obligation.
