Leírás:

Island of Krk: In an unspoiled bay, there is a plot of land intended for the development of a high-class tourist resort. Characterized by its natural pebble beach and untouched Mediterranean vegetation, the bay offers a perfect terrain configuration with a difference in elevation, which allows for panoramic views of the sea from each future unit.

Excellent location and accessibility

The land is divided into a T2 zone intended for the construction of a hotel and about 60 bungalows with a maximum capacity of 450 beds, and an R1 zone for sports and recreational facilities. The bay has direct access to the sea with a 3,000 m² beach and two additional nearby bays with beaches with a total area of another 3,000 m², ideal for organizing entertainment, sports and catering facilities. There are two road accesses to the land, which allow for easy traffic connections, and the possibility of a long-term concession to nearby beaches further increases the potential of the project.

Great market potential and unique offer

The planned concept includes high-class bungalows and a hotel with wellness and recreational facilities - a type of offer that currently does not exist on Krk. The location and planned facilities allow for year-round business, with great potential to attract guests from the wider region. The island of Krk is one of the most visited destinations on the Adriatic, with a tourist season lasting from March to November. At a time when demand for quality accommodation exceeds supply, the project represents an extremely attractive investment with a quick return on investment.

This project represents the last large plot of land on Krk intended for the development of a tourist

complex of this capacity, with ideal prerequisites for creating a recognizable destination for luxury holidays and sustainable tourism.

Project tourist resort island of Krk - hotel (70 rooms) + 60 bungalows + sports and recreational zone, on a plot of 75700 m² = 4.250.000 EUR
