This is a 3 Rai land plot in Koh Maprao that has been sub-divided and infrastructure started. Already in place are concrete and gravel roads so every lot within the project has government road access. Three phase electric is along the main government road that the project sits on.

The area is already water rich and there is a water pipe from where a mountain stream comes down underneath the main road to route rainwater into the pond, water is by well.

Lots 5, 5B, 6, 6B and 6C are already sold. Land plot 16 is a utility lot and lot 17 is a security lot between the access road and neighboring land.

Buyer can take over the existing land owning companies which makes it a straight forward purchase and reduces transaction costs.

The proposed and government approved bridge connecting Koh Maprao to Phuket is in the planing stages which will have a significant effect on land value increases once built.
