Sinj, city center, house for sale 4 floors, parking, garage

Sinj, detached authentic stone house in the old city center, floor area 150 m², total usable area 600 m², built on a plot of 235 m².

Each floor has a floor area of approximately 150 m².

The house consists of:

- ground floor of 150 m², which, given the location, can also be used as a business space, because it has direct access to the street (promenade), two larger business spaces or cafes are possible.
- on the first floor there is an apartment of 150 m², consisting of five rooms (four on the south side), a bathroom, one room on the north, a kitchen, a living room and a terrace of approximately 40 m²- on the second floor there is an apartment of 150 m². There are three rooms on the south side, a bathroom, a toilet, and on the north side a kitchen, a dining room, a living area with access to a terrace of approximately 10 m². This floor was renovated in the 90s, PVC shutters were installed- on the third floor there is an attic in an undeveloped state.

Although in the very center, the layout of the rooms gives the house a lot of peace and privacy.

The house was built in the early 1900s. Although in a preserved condition and with the possibility of living, the house needs renovation.

The ceiling height is 3.9 m and offers a number of possibilities.

An outdoor garage of 30 m², an entrance hall of the garage (also closed) of 18 m². The courtyard has a lot of greenery, and there is also space for outdoor parking.

Although divided into apartments, the house is being sold as a single unit.

With its surface area, garage, and outdoor parking, it offers numerous possibilities for both housing and

business purposes (hotel, hostel...)

The property is a real rarity on the market: location, surface area, architecture, ceiling height. Investing in this property is an extremely good investment!
