Rare and remarkable Lapa, Lisbon

Between the Basilica of Estrela and the Parliament, facing one of Lisbons most emblematic panoramas, this exceptional duplex offers a gross private area of 404 m², including more than 300 m² with a ceiling height above 1.80 m.

Located on the top floors of a beautiful 1920s building with lift, perfectly maintained and recognised for the quality of its architecture, it stands out as one of the most remarkable properties in Lapa, a historic and discreet residential address.

Overlooking the gardens of the Prime Ministers residence, the National Assembly, the historic city and the Tagus River, it offers spectacular views and an elegant lifestyle in an environment that is both central, confidential and serene.

Designed as a spacious family and reception apartment, this property has undergone a luxurious renovation under the direction of a renowned architect, former curator of contemporary architecture at

the Museum of Modern Art in New York and founding director of MAAT Lisbon.

The interior decoration, entrusted to a French decorator, perfectly expresses a refined and timeless art de vivre. Every detail has been custom-designed to combine comfort, aesthetics and functionality. The furniture, including the most functional elements, has been conceived as true design pieces.

The whole creates a harmonious atmosphere, where light, volumes, perspectives and materials interact with great subtlety.

4th floor

The main level features two entrances, a cloakroom, a guest toilet and a discreetly integrated laundry area.

The 50 m² triple reception room, facing south-east, opens onto a continuous balcony with striking views over the gardens, the city and the Tagus. The generous volumes, natural light and quality of the finishes give this space a refined, elegant character, ideal for entertaining.

An office and a dining room with custom-made furniture, extended by a terrace, complete the living areas. The kitchen, adjoining the dining room, also benefits from a covered veranda, bringing additional comfort to everyday life.

An architecturally distinctive corridor leads to two spacious suites.

5th floor

A spectacular staircase, a true architectural feature, leads to the two upper suites.

Bathed in light through a large bay window opening onto the Tagus, the principal suite offers an atmosphere that is both intimate and majestic. It includes a large dressing room, numerous custom-made storage units and an elegant marble bathroom with a bathtub and shower.

A fourth suite, currently used as an artists studio, completes this level and offers an additional highly versatile space.

The sloping areas have been intelligently optimised to create 50 to 70 m² of very deep storage, perfectly integrated into the architecture of the apartment. This design combines the authentic charm of the top floors with perfectly controlled contemporary comfort.

To allow buyers to fully appreciate the volumes, light and perspectives of the apartment, several additional photographs are included. They show the main rooms without furniture, as well as a different parquet tone, offering an alternative view of the decorative and architectural potential of this exceptional duplex.

One covered parking space, located approximately 300 metres from the building, completes this property. An additional parking space for rent, close to the building, is also available.

As always, we accept partnerships. - REF: AA168
