A development project has already been prepared for warehouses for e-commerce, logistics and/or production facilities, with a possible total built-up area between 20,000 and 30,000 sq.m., depending on the needs, building height, and project parameters.

The property also offers the possibility to build a photovoltaic installation on the roofs of the buildings and around them, or alternatively the land could be used entirely for a photovoltaic park after the urbanization procedure is completed.

The project is intentionally left flexible so the future owner can adjust the purpose, building volume, and required electrical capacity before the final approval of the Detailed Development Plan by the Sadovo
