About the Area

Varna is a port city and seaside resort on Bulgaria's Black Sea, next to the coastal resorts of Golden Sands, St. Konstantin and Albena. It's famous for the 'Gold of Varna,' 6,000-year-old Thracian jewelry discovered in a necropolis, which is displayed inside the Archaeological Museum, along with Greek, Roman and Ottoman antiquities. A bar-lined waterfront promenade fronts 19th-century Primorski Par.

Varna Region is located in North-Eastern Bulgaria. It borders the regions of Dobrich, Shumen and Burgas as well as the Black Sea to the east. The region is generally hilly and along the river valleys of Kamchia and Provadiyska, it is plain. The seashore has wide stripes of sand towards which wooded mountain slopes run down in terraces. The coastal line is shaped by the bays of Varna, Kamchia and Sveti Yani as well as the promontories of Galata and Cherni (Black). The area is rich in ground and karst water. There are two firth lakes beside the sea - Varna and Beloslavsko, connected in 1923 by a navigable canal. There is mineral water rich in iodine near Varna and in the valley of Kamchia River.

Both industry and agriculture are well developed in Varna Region. The Ruse-Varna railway line, the oldest one in Bulgaria, passes through this area linking the Black Sea and Danube region.

Varna region offers conditions for cultural, balneological and eco tourism. The resort complexes of St.st. Constantine and Helena, Golden Sands (Zlatni Piasatzi), Riviera, Sunny Day (Slanchev Den), Kamchia, pearled along the coastal line, are wonderful places for rest.
