Rustic land with approximately 3.5 hectares, located close to the centre of Vale de Figueira. With agricultural potential, it has a borehole and access via a paved road frontage (to the south). According to the new Municipal Master Plan (PDM), it is classified as Type II agricultural production land, with no feasibility for residential construction. However, it borders construction plots to the north, which are included within the parishes urban perimeter, allowing the creation of a new frontage to another road and enabling residential construction.

Other construction possibilities include: support for agricultural and forestry activities, industrial establishments, tourism entertainment and leisure facilities, among others as defined in the Regulations.
