This Investment Property in the Dominican Republic is located on the main highway of the town of Cabrera in the province of Maria Trinidad Sanchez. The property is located in an established growing area with tourism infrastructure in one of the Dominican Republic's fastest-developing coastal regions.

This is a rare asset that generates income, provides a home, and holds expansion potential simultaneously. Ideal for owner-operators, investors, and commercial real estate buyers seeking strong fundamentals in a high-growth market.

The investment property combines commercial income, residential living, and development land.

1. Ground Level - Commercial Income

The street level features 7 commercial units and 2 bathrooms. The high-visibility location on the main road ensures consistent foot traffic and strong rental demand from retail, service, and office tenants.

2. Second Level - Main Residence

A spacious 4-bedroom, 2-bathroom home with living room, dining room, full kitchen, and laundry area. This level provides a premium owner-occupied residence directly above your investment — ideal for the entrepreneur who wants to live where they work, or for long-term residential rental income.

3. Third Level - Independent Apartment

A fully self-contained unit with its own bedroom, bathroom, walk-in closet, and kitchen. Perfect as a rental apartment, an Airbnb-style short-term rental, or a private guest suite.

4. Infrastructure & Security

The property is fully walled on all sides, with an 8-vehicle parking area, cistern, backup generator, and dedicated electrical room. Everything is in place to operate from day one with zero additional investment in infrastructure.

5. Expansion Opportunity

The adjacent lot of 945.59 m² (total area approx. 2,628 m²) is buildable land. Future development options include an apartment building, additional commercial units, or recreational/commercial amenity space — giving this investment significant upside beyond its current use.
