Sagres boasts some of the most impressive landscapes in the Algarve. The force of nature is so strong at the southwestern tip of all of continental Europe that visitors soon understand why the ancient settlers nicknamed it "sacred", why it was the starting point of Portuguese explorers in the 15th century towards the unknown, and how it managed to maintain its fascinating natural beauty.

The history of Sagres has been defined by its geographical location and the magnificent headlands of Sagres and Cape St. Vincent. The idea that the land ends here in these 50-metre-high promontories that plunge dramatically into the sea has been a constant source of mystery and attraction for visitors

Sagres belongs to the municipality of Vila do Bispo in the heart of the Costa Vicentina Natural Park. Throughout the county, there are several natural wonders where silence reigns, delighting its visitors.

The wild and rugged landscape of the west coast and the force and pull of the sea continue to delight visitors. The beautiful cliffs and long stretches of sand of the coast north of Cape St. Vincent have made it a place of choice for surfers, paragliders and lovers of wild and inhospitable natural environments. - REF: T2414
