The house is on it's own plot of land of 800 sq meters the area of the house is 100 sq meters . The house consist of two bedrooms , a bathroom, a kitchen and diner area . It also has celler of roughly 15 sq meters that can be used for storage. In the kitchen/dinning area there is two door that open to a viewing area of

This house is of grid which makes its carbon footprint very attractive to people that have an interest in our carbon usage down . The system would needed to be upgraded so as to use washing machines and hot showers but be alot cheaper than connecting to the grid and experiencing regular power cuts that happen from time to time .

The house is one story but a second story could be built where you have a three bedroom apartment and even a better view of the mountains and country side. The out door area can be developed so swimming pool and garden area can be developed and also have a small vineyard . This property has proper title so no hidden surprises .

## ABOUT THE AREA

The city of Knin is situated in the Dalmatian mainland, close to that source of the river Krka (Know from the National park Krka), do to it geographical position Knin is not a typical tourist, but for the Croatians the city is of great importance, mainly do to the following:

In the beginning of the second millennium, the city capital and seat of the Croatian kings – which also so explains why the city is referred to as that kings city or Zvonimirov grad.

The city has one of the largest fortification in Dalmatia, (The largest I have seen down here), during the last decade large parts of it has been completely restored.
