Omschrijving:	

Introducing a distinctive off-plan studio apartment opportunity in Tabanan – Nyanyi, one of the most exciting emerging destinations within the Bali property market. Offered at a pre-sales price starting from USD 109,700, this stylish leasehold apartment (valid until 2061) forms part of an innovative residential development located inside the visionary Nuanu Creative City. Designed for modern living and high-return rental potential, the project aligns perfectly with the growing demand for real estate investment in Bali. Scheduled for completion in Q2 2028, the studio apartments feature 31 sqm of thoughtfully designed interior space with high 3.5-meter ceilings that create a spacious and airy atmosphere. Each unit includes one bedroom, one bathroom, a fully equipped kitchen, and an enclosed living area, complemented by a striking panoramic window that maximizes natural light.

Fully furnished and ready for immediate use upon completion, these residences stand out among Bali homes for sale and compact Bali villas for sale alternatives in the expanding Bali residential real estate sector. The development spans 1.5 hectares and includes 83 premium villas alongside one main building with 20 studio apartments, blending desert modernism architecture with Moroccan dune-inspired design. Located just 700 meters from the Bali ocean and three minutes from Nyanyi Beach, the property sits within a vibrant lifestyle ecosystem while competing with nearby beachfront properties for sale in Bali and emerging Bali beachfront real estate. Residents benefit from a wide range of facilities including a main restaurant specializing in Arabic cuisine, lobby and reception services, reflection pools, landscaped gardens, parking areas, and a rooftop area currently under development. The community also enjoys

access to Aurora Park and proximity to Aurora Media Park, while more than 30 restaurants, a kindergarten, and an international school are located within a one-minute walk inside Nuanu City. This strategic location makes it an ideal Bali property for sale near amenities.

Constructed using anti-mould concrete panels and steel frame technology developed by Unit Space, the project emphasizes sustainability, efficiency, and durability—key aspects influencing modern Bali real estate trends. For investors exploring investment properties for sale in Bali, this project offers strong rental potential supported by analytical data from ULA.Zone. Whether you are buying property in Bali, researching real estate in Bali for foreigners, reviewing curated Bali real estate listings, or comparing Bali property for sale leasehold with Bali property for sale freehold, this opportunity represents a compelling Bali property for sale investment opportunity. Positioned between affordable Bali properties for sale and Bali property for sale luxury segments, it captures the future of Bali luxury real estate in one of the island's most innovative communities.
