Omschrijving:	
Located in Friendship Bay.	

In the hierarchy of Caribbean real estate, St. Vincent and the Grenadines offers an island for every specific profile of ultra-high-net-worth investor. While Mustique serves as the highly visible enclave for global celebrities, Canouan operates on a different frequency. Though not a private island, it is arguably far more private than Mustique—a quiet, frictionless sanctuary designed explicitly for a community of billionaires who demand absolute discretion alongside world-class infrastructure.

Investors do not come to Canouan to observe the yachting lifestyle; they arrive with their own. The island facilitates seamless access via a state-of-the-art superyacht marina and a 5,900-foot illuminated runway built specifically for heavy private jets. Daily life offers a sophisticated duality: playing a championship golf course by morning, and dining at the Mandarin Oriental, Soho House, or authentic local establishments by night.

However, acquiring prime beachfront land here is an exceptionally rare endeavor. The vast majority of Canouan's premium real estate is locked within master-planned luxury resort estates. Available raw beachfront plots that offer true autonomy outside of these resorts command premier status and are strictly, tightly held.

Location

This beachfront parcel represents a highly unusual opportunity for the buyer who prefers independence vs. a master-planned community. Situated perfectly between the authentic charm of the island's northern fishing village and the ultra-luxury southern marina, the property extends from the former airport road

directly to the water's edge. The shoreline is protected by a vibrant, living coral reef teeming with marine life and sea turtles, ensuring calm, crystal-clear waters. From the sand, the property commands uninterrupted, panoramic views of the Tobago Cays, Petit St. Vincent, and Union Island.

Development Potential

The development possibilities for this blank canvas are plentiful. With previous planning permission granted for a boutique hotel—the remains of which provide a tangible footprint for scale—an investor can pursue several avenues (subject to final planning approval):

A Legacy Private Compound: Design a bespoke, luxury oceanfront villa for personal use, completely detached from resort governance.

The Island's Premier Beach Club: Capitalize on the elite marina traffic by developing a world-class, owner-curated beach bar, restaurant, and boutique suite destination.

A High-Yield Enclave: Construct a two-story architectural asset featuring four ultra-luxury apartments for high-yield elite rentals

Furthermore, the site presents the compelling opportunity to operate entirely off-grid. The installation of a discreet solar array and a private saline treatment plant would render this beachfront asset fully self-sufficient.

This parcel is a strategic foothold on one of the Caribbean's most exclusive islands, delivering the ultimate luxury: autonomy.
