Commerce on the ground floor, housing on the upper floors

On the ground floor, there is the commercial space, consisting of three large rooms and a bathroom.

The configuration of the spaces allows the property to be adapted to different types of activity, according to the needs of each project and the legally permitted uses.

The location, a few meters from Praça da República, adds an important advantage for those looking to install their activity in the center of Vila Viçosa.

On the first and second floors the residential area is developed.

Consisting of two bedrooms, an equipped kitchen and other spaces to support the house, it allows you to maintain a clear separation between private life and the possible activity developed on the ground floor.

This configuration makes the property particularly versatile: it can be a solution for those who want to live and work in the same building, for those who are simply looking for a home with an independent space on the ground floor or for those who are looking at a property with investment potential.

A location that's hard to ignore

In this property, location is one of the main arguments.

Being a few meters from Praça da República means being in the heart of Vila Viçosa, close to commerce, restaurants, services and some of the main points of interest in the village.

A location that allows you to do much of the routine on foot and enjoy the identity, heritage and life of the center of Vila Viçosa.

More than a house or a commercial space in isolation, this is a property that brings together location, versatility and different possibilities in a single property.

If you are looking for a property in the center of Vila Viçosa where you can live, develop a project or invest, it is worth getting to know it.
