Description:	Farmland of 220,9 hectares for sale in the north of Chile.

The water rights are protected by article § 20. Since 1880 these saltpetre areas have been supplied with drinking water for many years. The agricultural valley is surrounded by hills on both sides and has a good road for vehicles.
road for vehicles.

The land is of volcanic origin and is ideal for agriculture. From the mid-19th century, it was used by British mining companies to supply their agricultural products to the saltpetre mines. In addition, this land is very suitable for electricity generation by solar and wind turbines, as it maintains a high and dry temperature almost all year round, as well as constant winds for wind generation.
