THE VENTURE

The Resort Terramar Residences consists of six two-family villas with typologies T2 (1 unit.), T3 (5 unit.) and T3 duplex (6 unit.).

The two-family dwellings overlap one on top of the other, functioning with common access stairs to the center.

On the ground floor, the accesses are through the main elevation, facing south.

The lower floor (Floor -1) is common to all fractions. Car access for parking is made by the side of the development and pedestrian access through two flights of stairs between the houses. Alternatively, and for the comfort of residents, it also has three elevators with direct access to the dwellings. In total, there are 12 closed garages, 11 of them for two cars.

Eighteen (18) public parking spaces were created outside.

In order to promote homogeneity in all the houses, it was decided to create a common language for the whole complex. On the ground floor, as well as in the entrance setbacks and courtyards, yellow granite stone will be placed bush-hammered at a fine peak, in combination with the insulation system (ETICS) on the remaining floors.

The frames will be made of anodized aluminum and in chromatic terms ecru and metallic gray are used.

Inside, we can find different dynamics that vary according to the typology and floors. However, the focus on abundant natural light and large, high-comfort spaces characterize all of the development's dwellings.

The choice of materials for the finishes took into account factors such as quality, aesthetics, durability and sustainability. Opting for good, beautiful and durable materials is essential to ensure a functional and pleasant environment, in addition to contributing to the preservation of the environment.

THE LOCATION

"Located by the sea, Canidelo is a parish that is only five kilometers from the county seat, being one of the most populous parishes in Vila Nova de Gaia. With numerous beaches, from Cabedelo to Madalena beach, passing through the beaches of Lavadores and Salgueiros, we can find in this parish not only the natural beauty of the seafront but also an urban place, with all the services."

Specifically, Rua do Cerro is an artery framed in the Canidelo-Madalena-Lavadores triangle with privileged access through Avenida Poeta Eugénio de Andrade which, in turn, allows the connection to and from the VCI, as well as to the streets that give direct access to the first line of the beach.

We are about 15 minutes (walk) from Canide Sul beach or 5 (by car) from Quinta do Fojo Golf.
