Description:

AB CERTIFIED SET by ECOCERT. At an altitude of 600 m, in an idyllic setting, where the municipal road ends on the heights of the commune of Vans, an old chestnut orchard of 1.3 ha awaits you. A breeding tunnel greenhouse (21/8m), insulated and reinforced according to standards, has been erected there and would be ideal for a project with laying hens. The place offers free rein to multiple agricultural projects (chestnuts, honey, fruit trees, wood...); or not (secondary residence), while preserving an exceptional quality of life! A few hundred meters away, a building from the 1850s has been optimally renovated! Upstairs there is a very bright staff accommodation (one room) of more than 27 m². One of the doors opens onto a small south-facing terrace. This structure is arranged under a solid chestnut frame, and also includes a kitchen area and separate bathrooms. The wood stove purrs there. The window openings, 80 cm deep, are all equipped with double glazing. The roof, typical and in perfect condition, has been renewed in slate with OMEGA10 tiles (water and air proof). The insulation is made from wood wool. Very recent developments; such as plumbing, electricity, individual sanitation (micro wastewater treatment plant) are always guaranteed by the craftsmen. On the ground floor, there is a new, operational processing laboratory, which was manufactured according to European standards. It consists of two rooms and a concrete cellar. This pretty agricultural property, isolated but in the heart of a small hamlet, is located between Vans (07), Genolhac (30) and Villefort (48).
