Description:

In the village of Pašman, on the island of the same name, there is an attractive building plot. The surface area of the plot is 842 m², and it is situated 80 m from the sea, while the distance by road access is 250 m.

The land is flat, almost square in shape, with a width and length of 21 m, with elongated ends – each 25 m long – which are an excellent addition to the plot as they offer numerous possibilities for arrangement and use of the space. The upper part can be organised as a private access directly from the road with parking, while the lower extension on the sea-facing side can be arranged as a garden and relaxation area with a jacuzzi and sunbathing terrace. All necessary infrastructure connections are located in the immediate vicinity of the plot.

This property is ideal for the construction of a holiday home or an apartment building, whose future owner will enjoy sea views, a large sandy beach, and magical sunrises that give this location its special Mediterranean charm.
