Description:

Inspired by how imagination can create endless possibilities, WHIZDOM CRAFTZ SAMYAN is a home for the new generation far beyond conventional urban living. This residential concept offers both privacy and flexibility, with design focused on detail, providing a variety of perspectives to inspire and illuminate under the concept of UNFRAME VIEWS.

The first view focuses on a new green space with flexible uses and the feel of an urban forest. This concept transforms the sense of entering an urban residence, with the tranquility of nature in the heart of a metropolis. Entering and leaving the residential area will be like a trip to the forest from the center of the city.

The next view extends in different directions. Green space in the city gives inspiration and energy to create new possibilities each morning. An evening view of the Chao Phraya's majestic curves at sunset gives relaxation, focus, and unlocks unlimited imagination. All can happen in the same space.

A further perspective in functional areas is the feel of natural space with innovative decoration uniting nature and technology. The building and architecture evoke nature in the heart of the metropolis through green areas from various viewpoints, connecting with the city and the sky in a modern architectural style

for new-generation residents. Each detail is designed to spark the imagination and immerse you in nature in the city.
