Up for grabs: a large 8,400 sqm residential land, ideally located in a sought-after area in the north of Mauritius, very close to the sea. This land represents a particularly interesting opportunity for an investor or developer wishing to develop a residential project with high potential. The land is sold with an already approved project for 19 villas intended for the local market, with a major advantage: the building permit has already been obtained. Its large surface area, its strategic location, and its proximity to the coast make it a rare product on the market. The project saves precious time on administrative procedures and allows for rapid progress on an already structured real estate operation. The program plans for an intimate residence consisting of 19 villas with private pools, landscaped gardens, private parking, and living spaces designed to offer a modern, pleasant, and tropical setting. Ideal for a developer or investor wishing to position themselves on quality land, very close to the sea, with a residential project already approved and ready to be developed.
