We present you a modern three-bedroom apartment under construction, located in a new exclusive residential complex in Dugo Selo, designed for a comfortable, safe and energy-efficient lifestyle.

The apartment consists of an entrance hall of 8.66 m², a spacious open-concept living room with a kitchen and dining room of 21.73 m², two comfortable bedrooms of 8.85 m² and 6.33 m², a bathroom of 5.27 m², a storage room of 2.82 m² and a loggia of 2.82 m², which provides additional space for relaxation and enjoyment throughout the year.

The residential building is built with a reinforced concrete structure and extends over a total of four floors connected by a modern low-noise elevator and a well-maintained staircase, ensuring maximum functionality and accessibility.

Special attention has been paid to energy efficiency and quality of housing. Each apartment is equipped with underfloor heating in all rooms via an air-to-water heat pump, while additional air-to-air heat pumps ensure a comfortable temperature throughout the year and serve as a secondary energy source. For cooling purposes, the installation of modern wall-mounted air conditioners is planned.

The safety of the tenants is ensured by anti-burglary and fire-resistant entrance doors, while the interiors will be decorated with premium quality multi-layer parquet floors adapted to underfloor heating. Common areas, bathrooms and external surfaces will be covered with top-quality ceramic tiles of modern design.

The location provides an ideal combination of peaceful family life and excellent transport connections. Planned completion of construction: April 2027.

The property represents an excellent opportunity for a quality family life, but also a safe investment with long-term potential for value growth.
