ABOUT THE AREA

Utila is one of the Bay Islands of Honduras, in the Caribbean, north of the mainland. It's known for its coral reefs and many dive sites. The Whale Shark and Oceanic Research Center studies this large fish species found in the surrounding waters. The Iguana Research and Breeding Station is dedicated to preserving the endangered spiny-tailed Utila iguana. Utila town (East Harbour) is known for its nightlife.

Honduras is a Central American country with Caribbean Sea coastlines to the north and the Pacific Ocean to the south. In the tropical rainforest near Guatemala, the ancient Mayan ceremonial site Copan has stone-carved hieroglyphics and stelae, tall stone monuments. In the Caribbean Sea are the Bay Islands, a diving destination that's part of the 1,000 km-long Mesoamerican Barrier Reef.

White beaches fringed by the world's second-largest barrier reef, jungle-covered mountains cut by raft riding white-water rivers, and home to an astounding number of bird species, exquisite Maya ruins, colonial, cobblestone villages, fresh seafood grilled on the beach... Yes, all this is found in Honduras.
