Villa for sale on golf course in Costa Calida, Altaona Resort

Welcome to golf new build villas, a unique opportunity to experience life in Murcia like never before. Each residence is nestled seamlessly in its stunning natural surroundings, granting unique access to the outdoors that includes vast green areas and extensive trail networks leading into the mountains. The homes are carefully crafted to ensure uninterrupted views of the golf course, lakes, and distant countryside from both the interior and exterior. Featuring south-facing gardens and terraces, you can enjoy the warm winter sun, while the expansive windows provide panoramic views of the region from the comfort of your home.

The golf villas themselves have been carefully crafted to prioritize comfort, privacy, and efficiency. These principles extend to the entire development, granting you convenient proximity to the city, local beaches, and quality medical facilities within minutes, while enjoying a serene and tranquil atmosphere when you return home. For those seeking travel opportunities further afield, two airports are located within an hour's drive. The golf villas present an unparalleled living experience in the coveted Costa Calida region.

The team of architects and designers possesses a deep understanding of the significance of integrating a house harmoniously with its environment. The homes feature a low-profile design that seamlessly merges

with the surrounding landscape. Moreover, stepping into your garden evokes a distinctive mountain atmosphere. The walls exude a warm, natural radiance thanks to partial stone facades, allowing the structures to blend effortlessly while ensuring effective thermal insulation.

Even the flat roofs provide captivating views in all directions. Deliberately planted with indigenous vegetation, the rooftops create an additional natural space. Beyond their aesthetic allure and delightful aromas, these plants serve as natural deterrents, keeping pests such as wasps and mosquitoes at bay, thereby further enhancing your comfort.

The designers have meticulously optimized the utilization of available space, adhering to modern Northern European standards. The U-shaped building design ensures practical distribution of square footage and maximum privacy from neighbors. Employing the innovative SISMO building system guarantees your property boasts a high efficiency rating, exceptional acoustic and thermal insulation, thereby maintaining optimal temperatures and reducing noise. Additionally, this system eliminates common issues associated with traditional building methods, such as cracks and humidity problems.
