The word from architect Jean-Pierre Sauna

"The design is a traditional mountain architectural script adapted to the implantation site characterizing the project. The linearity creates apartments to enjoy extensive large terraces, and a panoramic view of the ski area and the amazing landscape. The use on the facade of typical and noble materials such as stone and wood helps to emphasize a volumetrically controlled scale and a warm and authentic perception. Leisure and wellness areas such as swimming pool, sauna and barbecue area are related to the quality of the use of homes. Architecture is a form of living."
