Описание:	

Two-storey wooden house in Jūrmala with a picturesque view of the renovated Ķemeri Park

The house is located in a green and peaceful part of the city. All utilities are connected to the city network.

A major renovation was carried out in 1987: the walls were insulated, and the layout was updated. Most of the windows have been replaced with PVC.

The house contains 8 separate apartments, which are currently rented out.

Convenient location: shops, public transport, kindergarten, school, and children's playground are all within walking distance. Access to the property is available from both Alejas and Katedrāles streets. The sea is just 5–7 minutes away by car.

Ķemeri is actively developing and attracting significant investment. As part of the "Reviving Ķemeri" project, large-scale infrastructure renovations are underway, along with the creation of a nature tourism center. Its proximity to the national park and mineral springs makes it attractive to tourists, investors, and entrepreneurs.
