Описание:	

Designed as two neighboring villas that can function independently or as one seamless residence, this interconnected property offers a rare level of flexibility in Ungasan's peaceful Yellow Zone. A discreet connecting door allows both villas to be opened into a single private compound or closed off for separate use, making it ideal for extended family living, dual-rental strategies, or an owner-stay with income potential. Surrounded by a calm environment away from noise and crowds, the setting emphasizes privacy while remaining practical for long-term use.

Sitting on total 540 sqm of land with a total building size of 330 sqm, the layout consists of two fully furnished, each equipped with its own private swimming pool, private parking, kitchen set, and a balanced mix of enclosed and open living areas. Altogether, the property features five bedrooms and five bathrooms, generous balconies, and a well-maintained garden area that connects the overall compound visually and functionally. Each villa is fully self-contained, yet the smart connection creates a versatile living configuration rarely found in this segment.

Located in a tranquil part of Ungasan within a Yellow Zone, the property is well-suited for long-term investment while remaining highly attractive for private use. The dual-villa concept allows owners to adapt the space over time—whether for family growth, rental optimization, or future resale flexibility. With its quiet surroundings, thoughtful layout, and long-term usability, this interconnected villa compound stands out as a strategic property asset in Bali's southern region.
