Açıklama:	

A high-quality wind farm portfolio in the wind-rich northeastern region of Brazil is for sale. The portfolio comprises two fully constructed and operational wind farms with a total installed capacity of 111.12 MWp.

The projects benefit from excellent wind conditions, an existing grid connection, and long-term power purchase agreements (PPAs). The facilities have been operating successfully since 2016 and 2018, respectively, and feature an established technical infrastructure, including a substation.

With a total capacity of over 111 MWp, a capacity factor of approximately 49.5%, and long-term, predictable revenues, the portfolio offers an attractive investment opportunity in the Brazilian renewable energy market.
