With a relatively flat topography, the land offers easy construction conditions, helping to reduce overall development costs.

It benefits from an excellent east-facing orientation, ensuring great natural light and open views, highly valued features in the market.

Currently, the plot does not yet have direct access, as there is an intermediate property. However, there is already a municipal plan to create a road access to the land, which may be executed either by the Municipality or by the developer of the project, ensuring future accessibility and strong investment potential.
